

Cae of the Sky Garden Design Services

I offer edible landscape, garden and permaculture consultations and design services for small to medium yards. I specialize in edible plants, including edible flowers!

My services include a tour of your yard or a remote analysis where we can talk about sun aspects, microclimates and your desires and we can see what is already there. The tour usually takes about an hour. Then, I can create a rough map and list of recommended plants and plant guilds and where they could go, personalized to your specifications.

The price for this service including a tour, analysis and rough map/information for a small yard is \$50. For larger yards and food-forest designs, there is an additional charge of \$25 per hour.

My husband Ryan and I also offer small-scale installation services on a case-by-case basis. He specializes in rockwork and can help transform your yard, build garden beds, and plant plants. I can help with planting, weeding, and mulching. Our installation services cost \$40/hr per person. Please inquire about this service, as his schedule is often booked full. (We do not use heavy machinery but can recommend services that do if required).

If you have any questions about my services please email me at caeonamurdoch@gmail.com
